DEL-VAL RAPID DRY TEMPORARY ROOF SEALER

DESCRIPTION

Del-Val Rapid Dry Temporary Roof Sealer is a natural mineral compound that expands into a gel instantly upon contact with water, making a temporary, leak-proof seal for effective use during rainy & snowy weather. Del-Val Rapid Dry Temporary Roof Sealer can even be applied during rain to quickly move through standing water to stop leaks within minutes. Del-Val Rapid Dry requires no special equipment for handling or applying and its natural makeup is non-polluting and does not support flame.

APPLICATION

Pour Del-Val Rapid Dry directly from bucket into the suspected area of leak into an about a half-inch layer to begin sealing the leak. If within minutes the leak does not appear to have stopped, pour more Del-Val Rapid Dry. So long as the product remains wet, it will continue to seal the leak. Once the roof is dry, sweep up the residual product and make permanent repairs.

COVERAGE

Covers approximately 50 sq. ft. per pail.

WARNING

Del-Val Rapid Dry Temporary Roof Sealer becomes extremely slippery when applied to any surface upon contact with water. Use great caution when moving about. Do not place ladder or tools on the roof area where product has been applied. Be sure to remove residue from the roof before making permanent repairs. Water can reactivate the material to again form an extremely slippery surface. Applicator uses product at their own risk. It is sold as is and United Asphalt shall not be liable for incidental or consequential losses, damage or expenses.

VOC/VOS

None

CAUTION

Avoid breathing dust or contact with eyes. Do not take internally. Close container when not in use. Keep away from children.

CONTENTS

Proprietary. This product is not considered hazardous, however, it does contain a small amount of crystalline silica. Avoid breathing dust.
